Executive Summary

Provide a high-level summary of:

- Business Problem
- Proposed Solution
- Expected Outcome

Example:

The organization wants to improve its online ordering experience by reducing checkout friction and improving delivery visibility for customers.

Business Problem Statement

Clearly define the business problem being solved.

Focus on:

- Current pain points
- Business impact
- Operational challenges

Example:

Customers abandon carts frequently because the checkout process is slow and lacks transparent delivery estimates.

Business Objectives

Define measurable business goals.

Example Objectives:

Objective ID	Objective
OBJ-001	Improve online conversion rate
OBJ-002	Reduce checkout abandonment
OBJ-003	Improve customer satisfaction

Stakeholders

Identify all stakeholders involved in the initiative.

Stakeholder	Role	Responsibility
Business Team	Business Owner	Defines business goals
Product Team	Product Manager	Defines product behavior
Engineering Team	Engineering Lead	Evaluates technical feasibility
Security Team	Security Lead	Reviews compliance and security requirements

Scope Definition

Clearly define what is included and excluded.

In Scope

- Product catalog browsing
- Cart management
- Checkout flow
- Order tracking

Out of Scope

- International shipping
- Loyalty rewards
- Subscription services

Functional Requirements

Functional requirements define what the system should do.

Requirement ID	Description
FR-001	Users should be able to browse products
FR-002	Users should be able to add items to cart

FR-003	Users should be able to place orders
FR-004	Users should receive order confirmation

Non-Functional Requirements

Non-functional requirements define system qualities and constraints.

Requirement ID	Description
NFR-001	System should support 10,000 concurrent users
NFR-002	Checkout API response time should be under 2 seconds
NFR-003	System should maintain 99.9% uptime
NFR-004	Sensitive data must be encrypted

Assumptions

Document assumptions made during planning.

Example:

- Users have internet connectivity
- Payment gateway integration is available
- Product inventory system already exists

Constraints

Define known limitations and restrictions.

Constraint Type	Description
Budget	Project budge is limited to \$100,000
Timeline	MVP must launch within 4 months

Compliance	System must comply with data protection regulations
------------	---

Risks

Identify possible risks that may impact the initiative.

Risk ID	Risk Description	Impact
RISK-001	Delays in third-party payment integration	High
RISK-002	Incomplete business requirements	Medium
RISK-003	Unexpected infrastructure cost increase	Medium

Success Metrics

Define measurable indicators of success.

Metric	Target
Checkout Abandonment Rate	Reduce by 20%
Order Success Rate	Improve to 98%
Customer Satisfaction Score	Increase to 4.5/5

Dependencies

Identify external systems or teams required for successful delivery.

Dependency	Description
Payment Gateway	Required for checkout processing
Inventory Service	Required for stock validation

Logistics Partner	Required for shipment tracking
-------------------	--------------------------------

High-Level Timeline

Phase	Estimated Timeline
Requirement Gathering	2 Weeks
Product Planning	2 Weeks
Engineering Design	3 Weeks
Development	8 Weeks
Testing & UAT	3 Weeks

Additional Notes

Add any additional business considerations, references, or context.
